

MES INSTITUTE OF TECHNOLOGY AND MANAGEMENT

CHATHANNOOR PO, KOLLAM 691572

DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING

Seminar Presentation Guidelines

Semester: S7 B.Tech

Course Code: CSQ413

Credits: 2

-
- The Department shall form an Internal Evaluation Committee (IEC) for the seminar with academic coordinator for that program as the Chairperson/Chairman and seminar coordinator & seminar guide as members. During the seminar presentation of a student, all members of IEC shall be present.
 - Formation of IEC and guide allotment shall be completed within a week after the University examination (or last working day) of the previous semester.
-

1. Topic Selection

- **Area:** Should be from the student's domain of interest in **Computer Science and Engineering**.
- **Nature of Topic:** Broad-based, current, and preferably related to the **final year project domain**.
- **Sources:** Paper from peer-reviewed journals, technical magazines, conference proceedings, or a reputed technical thesis/report.
- **Approval:** Get the topic approved by the **Internal Evaluation Committee (IEC)** within the **first 2 weeks** of the semester.

◆ 2. Seminar Report (Printed)

- **Length:** 30-35 pages (excluding cover, acknowledgement, contents, references etc)
- **Soft Binding with Bind Colour as instructed by the department (Black)**
- **Format:**
 - Font: **Times New Roman**
 - Font Size: **12 pt** (for body), **14 pt bold** (for headings)
 - Line Spacing: **1.5**
 - Margins: **1 inch** on all sides
 - Alignment: **Justified**

- Header: **Department of Computer Science & Engineering (Right Aligned)**
- Footer: **MESITAM (Left Aligned) and Page Number (Middle or Right Aligned)**
- **No Header/ Footer till Contents page.** Normal Continuous numbering starts from Chapter 1-Introduction page. Special number shall be given to Contents to List of Figures

◆ 2. Seminar Rough Report (Printed)

- Shall be submitted to the respective guide for correction as soft copy within one week after the presentation.
- Corrected copy shall be printed and get approved by the Guide and Project Coordinator with physical signature
- Original report shall be printed and binded only after getting the approval from Project Coordinator

Structure:

Title Page (as per template)

Certificate

Acknowledgment

Abstract

Table of Contents

List of Abbreviations

List of Figures

Introduction

Related Work / Literature Survey

Main Content (divided into sections)

Conclusion & Future Scope

References (IEEE format)

◆ 3. PowerPoint Presentation Guidelines

◆ No. of Slides: 20–25 Slides (excluding cover, acknowledgement, contents, references etc)

- Shall be submitted to the respective guide for correction as soft copy before one week of the presentation.
- Corrected finalized presentation shall be submitted to the project coordinator before three days of presentation.

◆ Suggested Slide Structure:

Slide No. Content

1	Title Slide (Seminar title, name, roll number, guide's name, dept., college)
2	Introduction to the Topic
3	Problem Statement / Motivation
4	Literature Survey Summary
5–14	Main Content / Methodology / Key Findings
15	Tools / Technologies / Diagrams
16	Applications / Use Cases
17	Challenges / Limitations
18	Conclusion and Future Scope
19	References (with 4–6 authentic citations)
20	Thank You / Q&A Slide

◆ Design Guidelines:

- Font: **Calibri / Arial**
- Font Size:
 - Title: **28–32 pt**
 - Body Text: **20–24 pt**
- Use **bullets**, not paragraphs.
- Maintain **consistent color scheme** and **simple backgrounds**.
- Include **figures, charts, or diagrams** wherever relevant.
- Avoid overcrowded slides—**6 bullet points max per slide**.
- Footer in all Slides except Title: Department of Computer Science & Engineering, MESITAM

◆ 4. Evaluation Criteria (As per KTU)

Criteria	Marks
Guide Evaluation	20 (Background knowledge: 10, Topic relevance: 10)
Coordinator Evaluation	20 (Diary: 10, Attendance: 10)

Criteria	Marks
IEC Presentation Evaluation	40 (Clarity: 10, Q&A Interaction: 10, Involvement: 10, Slide Quality: 10)
Report Evaluation	20 (Technical content, template, references)
Total	100 marks (CIE only)
Passing Criteria	Minimum 50 marks

♦ 5. Seminar Diary

- Mandatory.
- Maintain **weekly entries** about progress.
- Reviewed and signed by guide every week.

♦ 6. Abstract

Purpose of the Abstract

- To give a **concise summary** of your seminar topic.
- Helps readers quickly understand the **scope, approach, and significance** of the seminar.
- Should allow someone unfamiliar with your topic to grasp the **essence** of your work.

Length

- **Word Limit:** 250–300 words.
- Should fit on a **single page**.
- Avoid unnecessary details, tables, or references.

Structure of the Abstract

The abstract should have **four essential components** (can be in a single paragraph):

Introduction / Background

- Briefly set the context of the topic.
- State the problem or motivation behind the seminar.
- 2–3 sentences.

Objective

- Clearly state the aim of your seminar.
- Example: “The objective of this seminar is to review recent advancements in...”

Methodology / Approach

- Outline how the study or review was conducted.
- Mention the type of sources used (journal articles, conference papers, technical reports, etc.).

Key Findings / Conclusion

- Highlight major insights or outcomes from your study.
- Include the potential applications or future scope in 1–2 sentences.

Formatting Guidelines

- **Font:** Times New Roman
- **Font Size:** 12 pt
- **Line Spacing:** 1.5
- **Alignment:** Justified
- **Margins:** 1 inch on all sides
- **Heading:** Center-aligned, bold, in all caps – “*ABSTRACT*”

Dos and Don'ts

Do:

- Keep it concise and clear.
- Use formal academic language.
- Write in **past tense** for completed work, **present tense** for facts.

Don't:

- Include diagrams, figures, or bullet points.
- Cite references in the abstract.
- Use overly technical jargon without explanation.

Sample Abstract

ABSTRACT

Artificial Intelligence (AI) has emerged as a transformative force in modern computing, enabling machines to perform tasks that traditionally required human intelligence. This seminar focuses on recent advancements in deep learning algorithms for natural language processing (NLP). The objective is to review state-of-the-art techniques, identify their strengths and limitations, and explore their applications in real-world scenarios such as chatbots, automated translation, and sentiment analysis. The study is based on an extensive review of peer-reviewed journals, conference proceedings, and technical reports published in the last five years. Key findings indicate that transformer-based architectures such as BERT and GPT models have significantly improved performance benchmarks, yet challenges remain in computational efficiency and bias mitigation. This seminar concludes with insights into future research directions, including low-resource language modeling and ethical AI development.

♦ 7. General Tips

- Practice your presentation multiple times.
- Time limit: **20–25 minutes + 3–5 minutes Q&A.**
- Dress formally and be punctual.
- Understand every slide thoroughly.
- Maintain eye contact during presentation.
- Invitation with Abstract shall be given to all faculty members of the department at least one day prior to presentation
- Refreshment shall be arranged
